Customer Discovery & Research Survey

Startup concept: Technology solutions to simplify daily operations for small businesses

Document type: Survey template for future customer discovery. This document contains questions only; it does not claim that interviews or surveys have already been conducted.

Purpose

This survey is designed to understand how small-business owners manage everyday operations, which tasks create friction, what tools they currently use, and whether a practical digital solution could help. Use responses from real participants to validate the problem and refine the product.

Participant information

Participant code (optional)	_____
Business type / industry	_____
Business size	1–5 employees / 6–20 / 21–50 / 50+
Role	Owner / Founder / Manager / Other
Date	_____

Survey questions

1. How do you currently manage daily business operations?

_____

2. Which tasks take the most time or are hardest to coordinate?

_____

3. How often do these difficulties occur?

Daily / Weekly / Monthly / Rarely

4. What tools do you currently use (spreadsheets, messaging apps, accounting tools, etc.)?

_____

5. What is the biggest limitation of your current process or tools?

_____

6. Have these issues caused delays, extra costs, missed tasks, or customer-service problems? If yes, please describe.

_____

7. Which capabilities would be most useful in a digital solution?

Task/workflow tracking / Reminders / Reporting / Team coordination / Other

8. How important would it be to simplify these operations?

Not important / Slightly / Moderately / Very / Extremely

9. What concerns would you have about adopting a new tool?

_____

10. Would you be willing to test a prototype or discuss this further?

Yes / No / Maybe

11. Additional suggestions or comments

_____

How to use this document

Share the survey with relevant business owners or startup founders, record their answers accurately, and summarize the results only after collecting responses. Do not enter invented testimonials or present this template as completed research. If you upload this template to StartupReady, label it as a proposed survey template rather than completed customer validation.

Response summary (complete after real responses are collected)

Number of participants: _____ Date range: _____

Common pain points identified: _____

Tools currently used: _____

Potential product improvements: _____
